Anastasiia Tabakova, Full-stack developer

PROFESSIONAL SUMMARY

Results-oriented and highly skilled Full-Stack Developer with a proven track record of over 6 years in web development, encompassing a diverse range of projects and responsibilities. Proficient in JavaScript and PHP, with expertise in ReactJS, Laravel, and various technologies. Creating dynamic and user-friendly web applications. My experience extends from freelancing to contributing as a member of startup teams. Has good analytics and communications skills, always executes tasks responsibly and proactively. I quickly and easily learn new practices if necessary.

TECHNOLOGY SUMMARY

Languages:	JavaScript, JSX, PHP, SQL, HTML/CSS
Technologies and Frameworks:	ReactJS, Laravel, GIT, Wordpress, Drupal, PHPMyAdmin, Ispmanager, CPanel, REACT Router, jQuery
UI-frameworks:	Bootstrap
DBMS:	MySQL
IDEs and Tools:	Visual Studio Code (VS Code)
Other skills:	REST API, OpenAPI, Swagger, Deploy React, PuTTY, Deploy Laravel, SSH, FTP, Photoshop, Метрики (Google, Yandex), Search engine optimization, connecting payment gateway
OS:	Linux, Windows
Languages:	English, Russian

KEY TECHNICAL SKILLS

PHP, JavaScript (React)

PHP
- Syntax and Basic Concepts. Understand the basic syntax, data types, and control structures in PHP. Know how to declare variables, use operators, and work with arrays.
- Server-Side Scripting. Proficiency in writing server-side scripts to generate dynamic web pages. Knowledge of how PHP interacts with web servers.
- PHP Data Handling. Manipulate and work with data. Understand the use of associative arrays and other data structures.
- MySQL Integration. Ability to connect to databases (MySQL), and perform CRUD (Create, Read, Update, Delete) operations. Knowledge of SQL queries for database manipulation.
- Forms and Data Handling. Skill in processing form data and handling user input securely.

- Understand form validation and sanitization techniques.
- Session Management and Cookies. Knowledge of PHP session handling for user authentication and state management. Understand the use of cookies for tracking user information.
- File Handling. Ability to work with files and directories, including reading, writing, and manipulating file systems.
- Object-Oriented Programming (OOP). Understand classes, objects, inheritance, encapsulation, and polymorphism.
- RESTful API Development. Ability to design and implement RESTful APIs using PHP.
- Understand HTTP methods, status codes, and request/response handling.
- Laravel PHP Framework.
- Version Control Systems. Experience with version control systems like Git for collaborative development and code management.
- Web Servers and Deployment. Knowledge of configuring and deploying PHP applications on web servers like Apache.

JavaScript
- Syntax and Basic Concepts, data types, operators, work with arrays and objects.
- Functions: creating and using functions, including anonymous functions and arrow functions.
- Understand concepts like scope, closures, and the this keyword.
- Asynchronous JavaScript. Knowledge of Promises and the async/await syntax for handling asynchronous operations. Understanding of callbacks and event handling.
- DOM Manipulation. Know how to traverse the DOM, manipulate elements, and handle events.
- AJAX and Fetch API. Understand asynchronous communication with the server using AJAX.
- Know how to make HTTP requests using the Fetch API.
- ES6+ Features. Familiarity with ES6 and later features, such as destructuring, template literals, and spread/rest operators.
- Modules and Bundlers. Know how to use modules to organize code. Familiarity with module bundlers like Webpack.
- Error Handling. Handle errors effectively using try/catch blocks and understanding error types.

React
- Component-Based Architecture. Understand the concept of components as the building blocks of a React application. Use mainly functional components.
- JSX (JavaScript XML). Proficiency in writing JSX, a syntax extension for JavaScript used with React.
- State and Props. Understand and manage component state. Work with props to pass data between components.
- Lifecycle Methods. Knowledge of React component lifecycle methods, including componentDidMount and componentDidUpdate.
- React Router. Familiarity with React Router for handling navigation in a React application.
- State Management. Understand different state management approaches, including React Context.
- Hooks. Proficiency in using React Hooks for state and side effect management. Knowledge of commonly used hooks like useState and useEffect.

- Forms and Controlled Components. Ability to work with forms in React, including controlled components.
- Conditional Rendering. Know how to conditionally render components and elements based on state or props.
- React Developer Tools. Familiarity with browser extensions and integrated developer tools for debugging React applications.

PROFESSIONAL EXPERIENCE

Freelancer (December, 2022 - Present)
Development of individual orders
Used languages and tehnologies: React, React Hooks, HTML/CSS, PHP, SQL, MySQL, phpMyAdmin, JavaScript, Bootstrap, connecting payment gateway, API

Robot-psihologist & Robot-doctor, Startup (2019-2022 – 3,5 years)
Full-stack developer
Responsibilities:
- website development
- website administration
- working in the team with doctors and psihologists

Used languages and tehnologies: HTML, CSS, PHP, SQL, MySQL, phpMyAdmin, JavaScript, Bootstrap, connecting payment gateway, API, Search engine advertising (Google and Yandex), Search Engine Optimization

Freelancer (2019, 1 year)
Development of individual orders
Used languages and tehnologies: HTML/CSS, PHP, SQL, MySQL, phpMyAdmin, JavaScript, Bootstrap, connecting payment gateway, API

Consulting company (2018, 1 year)
Full-stack developer
Responsibilities:
- Database Design
- Development of a data management system for storing information about orders,
- Development of a dashboard,

- Development of an analytics system,
- Development of a transaction storage system

Used languages and tehnologies: HTML, CSS, PHP, SQL, MySQL, phpMyAdmin, Bootstrap, API, parsing

Socstroyka, building company (2016-2017 - 2 years)
Full-stack developer, marketer
Responsibilities:
- Development corporative web-site from beginning
- Creating internal database for managing orders
- Development of a selling website structure and user interface
- Technical support
- Search engine optimization
- Graphic design
- Web design
- Advertising in search engines (Google, Yandex)
- Targeted advertising in social networks (Facebook, VK, myTarget)

Used languages and tehnologies: PHP, SQL, HTML/CSS, JavaScript, jQuery, phpMyAdmin, Photoshop, AdsManager, myTarget, Yandex Direct, Google AdWords, VK

VIRUS, Social media marketing agency (2016 - 6 months)
SMM-manager
Responsibilities:
- Search engine optimization
- Graphic design
- Web design
- Copywriting
- Advertising in search engines (Google, Yandex)
- Targeted advertising in social networks (Facebook, VK, myTarget)

Used languages and tehnologies: Photoshop, HTML/CSS, AdsManager, myTarget, Bitrix, Yandex Direct, Google AdWords, VK

EDUCATION

Bachelor's Degree in Management, 2016
Plehanov Russian University of Economics
